CLEANTOUCH

# WHITE

"Indulge in the epitome of luxury with our premium textures, elevating your kitchen set or furniture to a level befitting your discerning taste. Experience unparalleled sophistication that transcends all expectations."

# CLEANTOUCH

# CLEANTOUCH

## ELECTRON-BEAM TECHNOLOGY

We bring you this state-of-the-art surface, made with advanced Electron Beam Technology from Germany. Its finish so soft to the touch, yet never leaving behind a single trace. It embodies many other amazing features such as low-light reflectivity. Giving ultra matt an ultra new definition. What's more, it is easy to clean and easy to maintain. Clean Touch guarantees a care-free and anti-fingerprint life.

### HOW TO HEAL

**( *applicable only for micro-scratches )**

1. Place damp cloth/rags directly above scratches
2. Apply heat on cloth with iron for 10 -15 secs
3. Enjoy brand new surface again

## INFORMATION

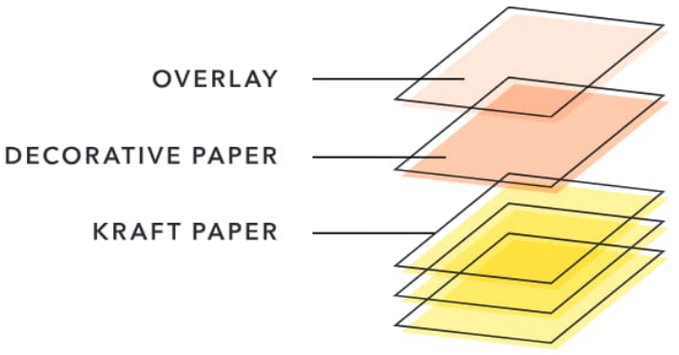

### MELATONE HPL

/

HPLs are durable and stable products, composed of a crisp layer of decorative paper - that is impregnated by melamine resin, followed by layers of phenolic resin impregnated Kraft paper, pressed together under high pressure and heat. Forming some of the floorings, wall panels, worktops, furniture and all other multipurpose applications in households, buildings, hotels, marine industry, food industry, healthcare, education, transport sectors etc, that we see today.

Besides it being one of the most Eco-friendly materials, they also feature impact resistance for the tenacious, scratch and wear resistance for the hardworking, heat resistance and many more, all in just a selection away.

### COMPOSITION OF MELATONE HPL

### SHEET SIZES

/

1230 x 2450 1230 x 3050 *measurements in millimetres (mm)

**THICKNESS:** 0.8mm thick

### APPLICATIONS

/

KITCHEN
HOTELS
FURNITURE
CABINET DOORS
RESTAURANTS
COLUMNS
COUNTERS
STAIRCASES

**BASIC USE:** We recommend **MELATONE HPL** for any interior, vertical and horizontal decorative applications. Besides the above stated, other possible uses can be stores fixtures, exhibit manufacturing and slat walls.

**NOT RECOMMENDED:** Areas exposed to high temperatures or exterior uses.

## PROPERTIES

### Wear & Tear Resistant

**MELATONE HPL** are naturally durable on its own. However, customers may further enhance surface durability, to withstand up to 800 cycles of friction, by adding a special overlay. Currently available in a variety of patterns and colors with multiple finishes.

### Heat Resistant

**MELATONE HPL** can withstand superficial heat for short periods of time without succumbing to any discoloration or damage caused by heat. Despite that, you should always avoid prolonged localized heating for all kinds of **MELATONE HPL**.

### Cigarette Burn Resistant

**MELATONE HPL** can resist damage from burning cigarettes to a great extent. The burnt location will usually only mattify and or slightly discolor if burnt severely. However prolonged local overheating should always be avoided all times, as it can still cause irreversible damage to the surface ultimately.

### Light Fastness

**MELATONE HPL** is less prone to color fading, changing of color or darkening under the influence of sunlight; thus, significantly increasing the lifespan of its vibrancing.

### Impact Resistant

Energy is absorbed during impact (by a blunt object), maintaining its beautifully finished look even after receiving force or shock over a quick moment, allowing you to be at ease at all times.

### Stain Resistant

**MELATONE HPL** are made naturally easy to maintain. With this stain resistant property, it doubles up protection and boosts its ability to withstand stains by a few folds, extending its long lifespan.

### Easy to Clean

**MELATONE HPL** are created with care and are easy to clean. Customers can also opt for more hygienic customization such as Anti-Bacterial, which is ideal for hospitals, childcare centers, F&B, etc.

### Eco-Friendly (ECO)

Melatone cares about your health. Thus we strive to reduce toxic chemicals such as Formaldehyde in all of our production. Improvement in the resin formula allows all Melatone's laminates to meet E-O, European formaldehyde emission standards.

## ENHANCEMENT SOLUTIONS

/

At Melatone, we always think of ways to help live life to the fullest. Good is never enough for us. Hence we went an extra mile to attain these exclusive properties that can be picked and chosen to add to any modern surfaces at just a simple request. These properties help maximise the potential of **MELATONE HPL**.

### Scuff Resistant

**MELATONE HPL** SR+ grade is a highly durable glossy finish with strong resistance to scuffing. While traditional gloss **MELATONE HPL** is not recommended material for sage-like tabletops, kitchen tops and vanity units, now **MELATONE HPL** SR+ provides the solution for using glossy colors and designs for horizontal applications. It is also ready to form down to 8R(radius) by using a proper post-forming machine.

### Electro Static Dissipative (ESD)

Electro Static Dissipative (ESD) **MELATONE HPL** contain a particularly conductive layer that effectively drains voltage away from your work surface.

### Anti-bacterial

We produce Anti-Bacterial **MELATONE HPL** with Melatone's unique ABL formula which can inhibit the growth of bacteria across the entire surface of **MELATONE HPL (ISO22196 tested). Diminishing 99.99% bacteria in 24 hours.**

### Chemical Resistant

This particular grade of **MELATONE HPL** is produced with unique resin to give it an extraordinary function that increases its chemical resistance. The laminate is suitable for places such as laboratories, research centers, etc.

## MAINTENANCE TIPS

**MELATONE HPL** are low in maintenance and simple to use. However, even the simplest of products require some maintanance to ensure an optimized living for you.

Like all surfaces, you are advised to clean **MELATONE HPL** regularly, through they usually do not require any special maintenance. Wiping them gently with a damp rag or cloth once in a while usually does the trick. Household cleaning products and disinfectants work perfectly fine as well, as long as they are not abrasive or alkaline.

## PRECAUTIONS

/

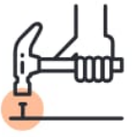

Always avoid continuous localised heating. We strongly recommend the usage of a kitchen trivet at all times.

Avoid rubbing the surface with highly abrasive materials like metal, nails or sandpaper.

Avoid having chemical solutions like acid, alkaline, and solvents coming in direct contact with **MELATONE HPL** at all times.

Never apply a direct impact to the surface, such as hammering or tossing heavy objects directly at it.

Never use sharp items like knife, meat cutters, penknife, pins etc. to scratch and damage the surface of the laminate.

# HANDLING & STORAGE

/

The way you handle **MELATONE HPL** can either shorten or preserve its lifespan. Always use the appropriate equipment, and handle each panel with care, especially its decorative side. Only with these proper methods can you live life with **MELATONE HPL** to the fullest.

## Storage

Store panels in a dry, clean frost-free room.

Place pallets and panels on a level surface which provides full support.

Keep **MELATONE HPL** in its original packaging whenever possible.

Remove steel straps if **MELATONE HPL** are to be stored for a long time.

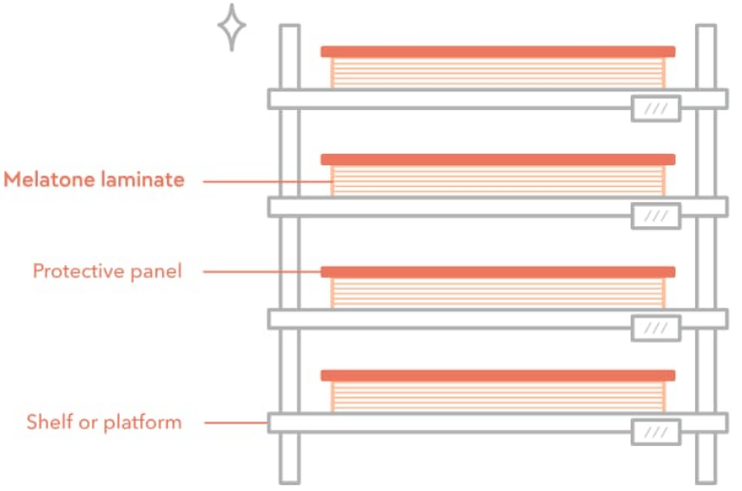

Prevent films of moisture from forming between panels.

Do not place any moisture-sensitive (paper) layers between the panels.

Do leave panels lying flat on top of each other.

Avoiding cavities between the panels, e.g. due to panels having been machined.

The way you handle **MELATONE HPL** can either shorten or preserve its lifespan. Always use the appropriate equipment, and handle each panel with care, especially its decorative side. Only with these proper methods can you live life with **MELATONE HPL** to the fullest.

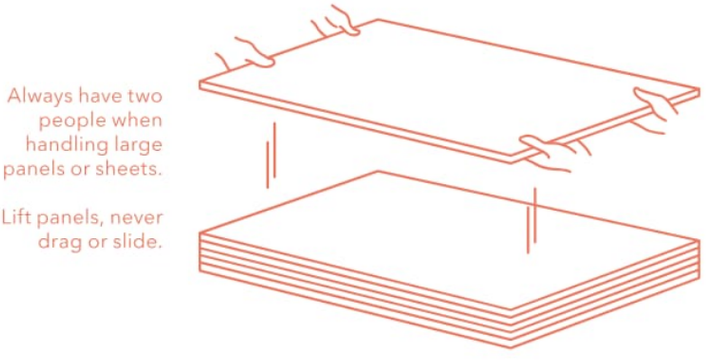

## Handling & Transport

**MELATONE HPL** must always be handled gently to prevent it from breaking or chipping.

When lifting and moving **MELATONE HPL**, never slide or drag panels. Always lift panels and avoid friction, between the surface side with the decor, at all times.

For marking or coding of **MELATONE HPL**, use adhesive stickers and remove it immediately after installations to prevent the occurrence of stubborn residue.

During transporations, secure **MELATONE HPL** with steel straps. Fit protective corner sections under the straps.
